OPEN-MINDED

PERSEVERING

E X P E R I E N C E

Here are three of the Project that i highlight the most,amoung others.

Web Front End - Freelancer

Pata gonia Paradise | San Martin de los Andes | 2023

I developed the website using React, CSS, and Email JS, which was deployed on Vercel, and the domain was purchased from GoDaddy.
The biggest challenge of this project was the deadline since the owner needed to have the website ready for the US and there was limited time. In addition to the website, I also offered to create a logo for them as they didn't have one

Henry Real Estate

Henry | Argentina | 2022

This was a project developed by a team of 8 members, where I worked as a full-stack developer, assisting both in the back-end and front-end parts.
My major contribution was the implementation of authentication using Auth0 and helping with team communication.

Portfolio

Agustin Benitez | Argentina | 2022

This project was created with the aim of showcasing my skills and demonstrating my work in action.
I utilized technologies such as React, CSS, Email JS, BoxIcon, Git, and Vercel for deploying the project.
